**YEARLING  
BULL SALE**

**Wednesday 4 October**  
Starts at 1pm

---

PLEASE NOTE NEW SALE VENUE OF:  
245 Backline Rd, Cave, South Canterbury

# KEY TRAITS

---

At Bluestone Herefords we are highly committed to gathering accurate and meaningful data to ensure that objective information supports our and your genetic decisions.

The herd is fully recorded with Breedplan (New Zealand Hereford) and the following measurements are taken:

- Birth weight (all calves are weighed at birth)
- Calving ease
- Gestation length
- 200/400/600 day weights
- Mature cow weight.

Cattle are also scanned for carcass traits including EMA & IMF. Full performance and pedigree information for all Bluestone cattle can be accessed online at [www.herefords.co.nz](http://www.herefords.co.nz). Go to the 'EBV enquiries' tab and search with the Bluestone prefix.

---

**We have also noted the following additional key traits that may be particular to each bull throughout this catalogue as follows:**

---

## HOMOZYGOUS POLLED

Homozygous Polled means that this bull carries a PP gene, and therefore all offspring from the animal will be born without horns (polled).

---

## GREEN BULL

Indicates genetically low levels of Blood Urea Nitrogen (BUN) meaning that they excrete less urinary nitrogen. They also show a tendency for higher 400-day, 600-day and maternal liveweight traits.

---

## EZICALVE

Ezicalve recognises the most appropriate beef bulls for heifer mating and the dairy industry. They meet high calving ease, low birth weight, good growth rate and high carcass quality, combined with a quiet-temperament. A full bull health protocol and physical standard is also adhered to.

---

# EBV'S / INDEXES

---

## **CALVING EASE (CE)**

Breed average: 2.8

Based on calving ease scores, birth weight and gestation length information. More positive EBV's are favourable and indicate easier calving.

---

## **GESTATION LENGTH (GL)**

Breed average:-0.7

Based on AI records. Lower (negative) GL EBVs usually indicate easier calving and increased growth after birth, due to more days of growth compared to their contemporaries.

---

## **BIRTH WEIGHT (BWT)**

Breed average:3.9

Based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth. This is particularly important when selecting sires for heifer mating.

---

## **200+/400+/600+ WEIGHT**

Breed average:

200+: 34

400+: 56

600+: 79

Growth EBVs are estimates of the genetic differences between animals in live weight at 200 (weaning), 400 (yearling) or 600 (later) days of age due to their genetics for growth. They indicate an animals ability to grow.

---

## **INTRAMUSCULAR FAT (IMF)**

Breed average: 0.6

IMF gives beef its aroma and flavour. Relative to the meat's bulk density, greater IMF means less muscle fibre and collagen, hence a more tender steak.

---

## **HEREFORD PRIME INDEX (HPI)**

Breed average: \$117

Focused on a commercial self-replacing herd where heifers may be retained, moderate emphasis on calving ease for mature cows and steers targeting 550kg live weight at 20 months of age.

---

## **BEEF HEIFER INDEX (BHI)**

Breed average: \$126

Estimates the genetic differences between animals in net profitability with emphasis placed on maternal traits. Key selection focuses on calving ease over yearling heifers.

---

## **DAIRY BEEF INDEX (DBI)**

Breed average: \$109

Economically weighted to reflect dairy beef profitability with emphasis placed on calving ease and growth. Developed specifically towards all progeny being destined for slaughtered at 20 months.

---

# HEALTH PROTOCOL

---

- TB** Herd status C10
- BVD** All bulls have been blood tested BVD antigen negative and have been vaccinated
- IBR** All bulls have been IBR vaccinated
- Lepto** All bulls have received vaccinations to cover Leptospirosis.  
An annual booster is recommended
- M.BOVIS** Herd status - tested and not detected

No bulls have been leased and any backup loan bulls have been sent direct to slaughter.

All bulls are classed as having a quiet temperament.

Bluestone Herefords is fully NAIT compliant.

All veterinary care and animal health products are provided by Vetlife.

## CONDITIONS OF SALE

All lots will be sold subject to the usual conditions governing auctions. Such conditions of sale will be posted at the venue at time of sale.

The purchaser or agent must state at the fall of the hammer if a transfer is required for any bull purchased for use in a registered herd.

Bluestone Farming Ltd retains the semen rights to all male animals with the Bluestone prefix. Transferred registered bulls may have semen collected for the owners's use. This semen cannot be sold, transferred or given away. A registered bull may have up to five owners at one time. If the owner/s wish to collect and sell semen, they can purchase the semen rights in a separate contract with Bluestone Farming Ltd. **Deadline for delivery of bulls is by 21 October 2023.**

*This catalogue has been compiled and produced by the vendor, and although every care has been taken to ensure accuracy, no responsibility is accepted for any error or omission that might be contained therein.*

The table below shows the 2022 Hereford Group Breed averages within New Zealand for you to compare any potential bull against:

	CE	GL	BWT	200+	400+	600+	IMF	HPI	BHI	DBI

**WELCOME TO**

# **THE BLUESTONE HEREFORD ADVANTAGE**

---

When buying Bluestone Herefords either as a bull, or semen, you not only benefit from the “white face advantage” for easier calf identification but also our leading genetics. Bluestone currently has bulls in the top 1% for the Hereford NZ Dairy Beef index and has the top ranking cows in the Beef Heifer index as well.

In addition we have been working on improving the environmental impact of farming to produce cattle with reduced urinary nitrogen. We call this our ‘Green Bull’.

We began by monitoring the concentration of urea nitrogen in blood (Blood Urea Nitrogen – BUN) of Bluestone cattle, and then have a genetic analysis on the results of animals.

The data indicates that animals do differ genetically for BUN, and that this is shown to be heritable and sires pass on low-BUN characteristics to their progeny.

Reducing urinary nitrogen is important because about 20% of nitrogen in urine leaches into groundwater while some is released to the atmosphere as the greenhouse gas nitrous oxide.

The data suggested that breeding with low BUN animals will produce low BUN progeny therefore excreting less urinary nitrogen.

Data also shows that animals with low BUN tend to have higher breeding values for 400-day, 600-day and maternal liveweight traits – making these perfect for the environmentally conscious farmer.

In addition Bluestone is part of Ezicalve which follows strict criteria around identification of generational data for high calving ease, low birth weight, good growth weight and high carcase quality, combined with quiet temperament.

**WORLD WIDE SIRES NEW ZEALAND**

# CRV FertaBull

**Short gestation.  
Low birthweight.**

## WHY FERTABULL?

- FertaBull contains the semen of three elite sires in each straw, meaning an increased length of time viable semen is available to fertilise the egg.
- Fertabull offers breed leading short gestation, calving ease and growth EBV's .
- No de horning required

## 3 BULLS IN ONE STRAW:

- Three Short Gestation Bluestone Hereford Sires in each straw (all homozygous polled)
- Supplied as a frozen semen product.
- FertaBull SG Hereford \$12.95+GST per straw

---

▶ **Increased fertility**

---

▶ **Tighten calving pattern**

---

▶ **Create value**

---

## HELMSMAN AUCTION

---

*Please note: typically the bidding interval will be set to two minutes but is at the discretion of the vendor.*

### The Benefits

- This method of running the auction combines the good features of both the auction system and sale by private treaty. You get the opportunity to bid on any lot in the offering and you pay competitive market value without any pressure.
- You have more time to consider lodging a bid.
- You can place genuine bids on any lot of your choice at any time during the sale period.
- You have the opportunity to re-assess each lot during the sale period without any pressure to make an instant decision.
- The Watch list facility allows you to monitor just those lots of interest and revise your bidding strategy as the auction progresses.
- You have the opportunity to take home the lots you want, irrespective of lot order. For example, having been out-bid on lot 36, your first choice, you can move back to your second choice earlier in the catalogue, for example lot 7.
- If you need more than one animal, Helmsman gives you flexibility and time to average your purchase costs.

### How it works

- After registering, intending purchasers request a bidding number.
- All lots are displayed for inspection, with detailed information provided for each lot.
- When the sale commences, all lots are on the market simultaneously.
- You may bid on any lot, regardless of lot number or order.
- You may open the bidding at its pre-set opening price or enter a starting bid of your own.
- Next bids advance multiples of \$100.00 (as set by vendor).
- There is no limit on the size of bid.
- Bids are recorded with the bidding number, and displayed on the Bidding Activity boards viewable on the lots detail page.
- You can bid on any number of lots at once and can see at a glance whether your bid still stands or has been overbid. There is no pressure to commit yourself to another bid. If your first choice lot goes over the limit you can still bid on any other lot on sale.
- A bid once submitted and recorded cannot be retracted, and the person responsible for submitting such a bid will be responsible for it until it is overbid.
- Bids placed on any lot within two minutes of the advertised closure time will extend the closure time.
- Further bids trigger the same process until no more bids are received in a specified period, which would signify the end of the sale.

## BUYERS INSTRUCTION SLIP

---

To be completed and handed to agents before leaving the sale. No verbal instructions can be accepted
